

Boeing 777X and Airbus A350 in Contention for Korean Widebody Order

Korean Air is considering both the Boeing 777X and Airbus A350 family for what could be a major widebody order, as well as leaning toward additions to its 787 fleet.

A350 – The plane which recently made the longest commercial flight. [Read More.](#)

Both Boeing 777X and Airbus A350 compete with each other in terms of fuel consumption and endurance and, of course, price.

The mankind is blessed to have both Boeing and Airbus in its midst.

Is the A350 or 777x better for Airlines? There are a number of key factors which are to be taken into account.

Ultimately, the final decision is up to you!
Which plane will you buy?
